SUMMARY

Backend Developer with strong proficiency in Java and DSA, experienced in building scalable backend systems and REST APIs. Skilled in Spring Boot, SQL, and system design fundamentals, with hands-on experience developing full-stack applications and integrating blockchain (Solidity/Web3) for secure and transparent workflows. Built real-world projects including a digital voting platform and music discovery system, focusing on performance optimization, data integrity, and clean architecture.

SKILLS

Languages: Java(DSA), Solidity, Python, JavaScript (Web3.js)
Blockchain: Smart Contracts, Hardhat, Web3.js, DeFi, Stablecoin Systems
Backend: Flask, REST APIs
Web: HTML, CSS
Database: MySQL
Tools: Git, GitHub, VS Code, IntelliJ IDEA
SoftSkills: Leadership, Analytical Thinking,Time Management, Problem Solving

PROJECTS

HipHopHub | Full-Stack Web Application | Live: https://hip-hop-hub.vercel.app/home *Jan 2026-May2026*
Technologies: : React, TypeScript, Spring Boot, Java, SQL, REST APIs

- Built a **Full-Stack** Desi Hip-Hop platform for music discovery, including artist catalogs, song browsing, and release tracking.
- Developed scalable **REST APIs** using **Spring Boot** and integrated a responsive **React/TypeScript** frontend.
- Designed and implemented interactive music-based games (artist/song quizzes, leaderboards) to increase user engagement.
- Improved data quality and performance by cleaning artist-song mappings, removing duplicates, and optimizing API response time.

Janadesh | Secure Digital Voting Platform *Aug 2025-March2026*
Technologies: React, TypeScript, Node.js, Express.js, PostgreSQL, Solidity, Hardhat, REST APIs

- Built a **Full-Stack** digital voting platform with secure OTP-based authentication and end-to-end election workflows.
- Developed scalable **REST APIs** using **Node.js/Express** for user authentication, election management, vote submission, and analytics.
- Implemented blockchain-based voting integrity using **Solidity** smart contracts with duplicate-vote prevention
- Designed **PostgreSQL** database schemas for users, candidates, elections, and vote records ensuring data consistency and security.
- Built responsive frontend using **React/TypeScript** and enabled cross-platform support with **Capacitor** (web + Android).

SWAT Coin — USD-Pegged Stablecoin *Jul 2025 – Nov 2025*
Technologies: Solidity,Hardhat, JavaScript (Web3.js)

- Built a fully functional stablecoin pegged to **$1 USD**, implementing mint, burn, and collateral control mechanisms.
- Developed smart contracts in **Solidity**, emphasizing gas optimization and secure token flows.
- Designed automated contract tests in **Hardhat** to ensure predictable and stable token behavior.

CERTIFICATIONS

- Google AI Essentials — Coursera
- AI & Robotics — Techkriti, IIT Kanpur
- Bits and Bytes of Computer Networking — Coursera

EDUCATION

B.Tech, CSE *2023 - 2027*
Vellore Institute of Technology, Bhopal, **8.24 / 10**

WORKSHOPS ATTENDED

- Participated in workshops focused on Web Development and Artificial Intelligence.
- Competed in multiple hackathons.

LANGUAGES & HOBBIES

Languages - English, Hindi
Hobbies- Writing, Music Enthusiast, Football, Chess, Gaming
