AAYUSH TIWARI

Computer Science Undergraduate | Java Backend & Software Development

+91 8949769958	aayushtiwari1001@gmail.com
LinkedIn	GitHub
Portfolio	

EDUCATION

DEGREE	INSTITUTE	CGPA	YEAR
B.Tech (CSE)	Vellore Institute of Technology	8.27/10	2023 - 2027

TECHNICAL SKILLS

LANGUAGES	Java
BACKEND	Spring Boot, Spring Security, Spring Data JPA, REST APIs, JWT
FRONTEND	React, HTML, CSS
DATABASE	MySQL, PostgreSQL

INTERNSHIP

Software Engineer Intern — **Accumet Solutions** — **Jun 2025 - Dec 2025**

300+ METERS | DAILY TESTING & VALIDATION | REAL-TIME METER DATA | MDMS MODULES

CORE MODULES	Worked on MDMS modules used for the daily testing and validation of 300+ three-phase electrical and water meters.
DATA HANDLING	Developed logic to collect and process readings from utility metering hardware for use in monitoring dashboards.
TESTING & DEBUGGING	Tested and debugged MDMS components with senior engineers as part of daily meter testing and validation.

PROJECTS

HipHopHub | Full-Stack Music Platform — **Jan 2026 - May 2026**

Live Demo | GitHub

React, TypeScript, Spring Boot, Java, SQL, REST APIs, Spring Security, JWT, Docker

ARCHITECTURE	Built a Spring Boot REST API with Spring Security and JWT authentication, along with a React frontend, Last.fm and iTunes integrations, and a Dockerized backend.
DATA QUALITY	Created an automated catalog-cleaning pipeline for 75 artists that removed 93 contaminated tracks and 102 invalid releases.
PRODUCT UX	Built a Guess the Song game with 1–30 second snippets, quizzes, a global leaderboard, and achievement tracking.

Waymark — AI-Assisted Development Governance Platform — **May 2026 - Aug 2026**

GitHub | VS Code Marketplace: Waymark

Java, Spring Boot, TypeScript, NVIDIA NIM

GUARDIAN CORE	Built a developer-governance platform that checks AI-generated code against project rules and architectural decisions using a local rule-based Guardian.
BACKEND & EXTENSION	Developed the Java 17/Spring Boot backend and TypeScript VS Code extension, using Project Memory, ADRs, relevant Git context, and rule-based code analysis to provide useful engineering context during AI-assisted development.
NIM & PUBLISHING	Integrated NVIDIA NIM for code assistance and remediation suggestions, then published Waymark as a VS Code extension with user-approved edits, stale-file checks, and post-edit Guardian verification.

ACHIEVEMENTS & OPEN SOURCE

GSOC	Google Summer of Code (GSoC) — Accepted as an open-source contributor and delivered code changes that were reviewed and merged by project maintainers.
FLIPKART GRIDLOCK	Participated in Flipkart's latest Gridlock engineering challenge, competing with B.Tech students from across India.
GITHUB	Recorded 450+ GitHub contributions across personal and collaborative repositories.
HACKATHONS	Bharat Academix Hackathon & Mahakumbh Tech Challenge — Designed and presented technical solutions during two national-level hackathons.

CERTIFICATIONS & TRAINING

GOOGLE IT SUPPORT	Google IT Support Professional Certificate (Coursera).
NETWORKING	Bits and Bytes of Computer Networking (Coursera).
WORKSHOP	AI & Robotics Workshop, Techkriti, IIT Kanpur.
